About us:

Thorr Sp. z o.o. company was created with support for the key branches of heavy industry in mind and specializes in widely understood welding and assembly services. Years of experience in shipyard, offshore and petrochemical industries transformed into well-oiled mechanism supplying the market leaders with the best specialists suited to their individual needs.

Due to the dynamic development of Thorr Sp. z o.o. we are able to offer our customers even more than before. We source and execute with pleasure commissions for specific tasks. Our portfolio contains a variety of tasks from as simple as laying the foundations to as advanced as an independent pipeline prefabrication.

By working on the market of the whole Europe we have the pleasure to extend our competences with every commission. Current number of employees of over 150 and employees database of over 5000 proven candidates as well as an equipment base guarantee dynamic realization of the entrusted commissions.

Crucial Customers

We are pleased to introduce our business partners. Thanks to them we were able to execute extraordinary projects, which we are proud of. Occasionally those are enormous constructions, engineering challenges, sometimes however it is our contribution to everyday life.

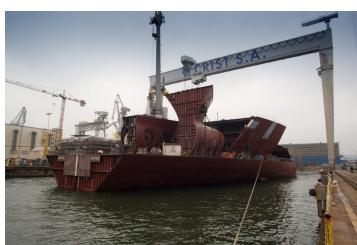

Energomontaż-Północ Gdynia

With our collaborative effort we realized projects for foreign principals such as Kverner, Aker or Blat. The highest level of quality and health and safety. With attention to details and in a timely manner.

Realization of projects for Crist strengthened our position in the shipyard industry. The possibility of taking part in every step of a production from prefabrication, through hulls assembly, all the way to piping equipment in the biggest polish shipyard. This is a guarantee for us, that we will be able to continuously provide similar services for other customers in the shipyard industry.

Crucial Customers

.....

Our contribution to everyday life may be observed through our years of cooperation with the POLKON company.

Containers for storing aviation fuel, pumping station in Radzionkowo, treacle container for sugar factory. Only welders with the highest qualifications could have worked on those projects.

H.CEGIELSKI-POZNAŃ S.A.

The legend of polish industry, HCP Cegielski. Wide variety of commissions, from bridges, through heavy industrial machines, finishing on unique blowers. That was a trial of multifunctionality for our employees.
